CARLSON ERIE CORPORATION

Established in 1955, Carlson Erie is a highly-respected fabricator of metal tanks and fixtures for the metal finishing industry as well as being capable to perform highly technical after processing services. The expert and knowledgeable design team of Carlson Erie can create racks, baskets, tanks and exhaust systems for any kind of metal finishing project. Our quality products will be custom built to your specifications, delivered on time and on budget! Let us have an opportunity to quote your next project!

Introducing PLASTIC FABRICATION! New in 2009!

Carlson Erie now offers tanks and exhaust systems custom fabricated in Polypropylene, Polyethylene, PVC and Copolymer. Also available are an array of baskets and containers for all metal finishing needs.

Custom Designed Equipment For Electroplating, Anodizing, Painting, Galvanizing and Material Handling

TANKS:

Custom designed and fabricated in any kind of metal including titanium, stainless steel, inconel and hastaloy. Insulated, unlined or lined: PVC, lead, titanium or koroseal liners.

TANK ACCESSORIES:

Copper bussings, flanges, run-offs, lips, edge protectors and covers.

COILS:

Special order for specific tanks: Stainless steel, lead or titanium. Coil rebuilds or repairs.

RACKS:

For plating, anodizing or galvanizing and uniquely designed for your parts.

The expert and knowledgeable design team of Carlson Erie can create processing racks, baskets and tanks for any kind of metal finishing project, no matter how large or small. Carlson Erie's quality fixtures will be custom built to your specifications, delivered on time and on budget! Let Carlson Erie have an opportunity to quote your next project.

In 2005, Carlson Erie celebrated its 50th year of quality plating equipment fabrication!

"After Processing" Machining Capabilities

2 Bridgeports with power feed	Gardner Grinder with dual 28" wheels
Avey (4 separate spindles) drill press with tapping unit	Rockwell belt/disc sander (12" + 18")
Baush 4 spindle drill press	50" Rousseue press break
Natco 8 spindle hydraulic drill press	5' Shearer
American Hold Wizard radial arm drill	Supermax 2 H.P. mill with power feed table
No. 3 Warner & Swasey turret lathe	5 Single spindle manual drill press (1 and 2 H.P. models)
Two No. 5 Warner & Swasey turret lathes with air chucks	Tig, mig and arc welders
Cincinnati dual mill	Several small tooling lathes
Brown & Sharpe horizontal mill	Mazak AJV-404
Dual belt, belt sander	Bolt Circles 3", 5", and 7"
Six station drill and tap machine, capable of drilling four (4) holes, chamfering four (4) holes, tapping four (4) holes and greasing (4) holes.	Tap sizes 1/2-13", 5/8-11" and 3/4-10" Machine produces 180-220 pieces per hour Plasma cutter
